

GEO SATIS

ODIN-1

- ✓ GPS / WiFi / Cellular
- ✓ Dual Fiber Optics
- ✓ Audio & Vibrate Alerts

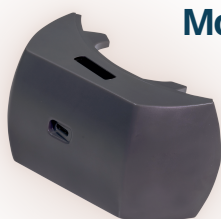

No Strap Tampers

Unique, secure design eliminates strap tampers allowing supervision staff to focus on "real" alarms.

20-Second Install & Removal

No tools for install and can be remotely or physically opened using an encrypted Key and/or an encrypted software command.

Mobile Charger

- ✓ **Waterproof (IP68)**
- ✓ **30-day memory storage**
- ✓ **Patented locking mechanism**

Introducing: ODIN-i

The ODIN-i GPS bracelets' innovative, no-strap design minimizes tampering and removal risks while providing advanced tracking capabilities.

Designed for security and reliability, ODIN-i provides peace of mind across diverse environments.

4+ Day Battery

At two-minute reporting and 30-second location captures, this operation reduces daily charge time and frequency of battery alarms.

Mobile Charging

Portable charging with a display that shows battery status and provides audio/visual notifications when fully charged.

GEOSATIS

Beacon

 DIN-i

Multi-Tamper Technology

Equipped with motion detection technology and light sensors to detect and report tampering.

Two (2)-Year Battery Life

Provides uninterrupted operation across multiple installations.

Transmission captured every 30 sec

Multiple low battery alarms

Water-resistant (IP67)

Home Curfew Monitoring

Beacon is a Radio-frequency (RF) transmitter that communicates with the GPS bracelet to provide consistent indoor location information more closely within a specific site. Status and alarms are included in the transmissions and are communicated to the software by the associated bracelet.

Easy to Use

Quick and easy installation, no external power source and no maintenance.

GEO SATIS

Victim App

Securing peace of mind

Victim App

Mobile Proximity Zone

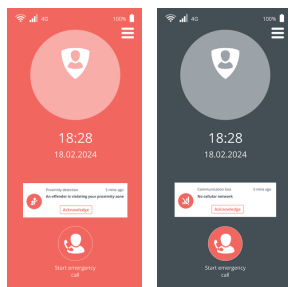

This customizable zone is linked to the app/victim so it “moves” with the phone. Alarm notification is made if offender violates the zone

Emergency Call Button

When pressed/held, phone auto-dials preset emergency number and an alarm is generated in the monitoring system.

The GEOSATIS Victim App

An app (with phone) for victims of domestic violence or other serious crimes. The app communicates location information to the monitoring system, for comparison to the offender GPS bracelet location.

- ✓ **Easy set-up**
- ✓ **Alarm acknowledgement**
- ✓ **Multiple phone-status alarms**

Alarm Notifications

Audio, vibration and visual notification generated on the Home screen when an alarm is generated.

Inbound Calls

Incoming calls are restricted to only those coming from the supervision agency.
