Monitoring Software (GMS)

○○○○

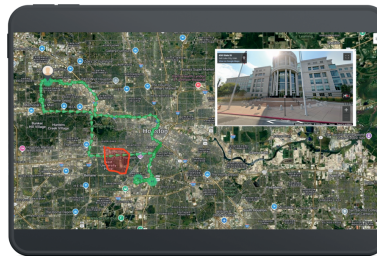

Remotely Open GPS Bracelet

Authorized users can send an encrypted "Open bracelet" command via GMS if officer Key is unavailable or in cases of emergency.

Pursuit Mode

Activates "Auto update" map mode and sends command to GPS bracelet to increase tracking and reporting intervals to 10 seconds.

Intuitive and Comprehensive

GMS is a secure, web-based monitoring system that collects and stores data from GEOSATIS products and provides an intuitive interface for users to monitor and manage the supervision of offenders.

Enhanced Mapping

View offender tracking information and create customized zones utilizing a full suite of Google Maps® and Open Street Maps.

Last Known Location

The map displays the last known location of all active offenders and if they have an active alarm.

- ✓ **Automated notifications**
- ✓ **On-demand reports**
- ✓ **Mobile Optimization**
