

GEOSATIS

Beacon

 DIN-i

Multi-Tamper Technology

Equipped with motion detection technology and light sensors to detect and report tampering.

Two (2)-Year Battery Life

Provides uninterrupted operation across multiple installations.

Home Curfew Monitoring

Beacon is a Radio-frequency (RF) transmitter that communicates with the GPS bracelet to provide consistent indoor location information more closely within a specific site. Status and alarms are included in the transmissions and are communicated to the software by the associated bracelet.

- ✓ **Transmission captured every 30 sec**
- ✓ **Multiple low battery alarms**
- ✓ **Water-resistant (IP67)**

Easy to Use

Quick and easy installation, no external power source and no maintenance.
